## TEA'S 2022 PLAN

TEA is on a mission to connect with common sense Americans about the importance of energy independence to their everyday lives, what they can do to make a difference, and to stop the Green New Deal from stealing their future.

Many Voices. One Mission. That is the TEA mantra and guiding philosophy for accomplishing change and affecting results.

Moving into the 2022 election cycle TEA will up its game by creating a parallel political track that runs alongside its education track. We will establish TEA PAC in order to do direct political expenditures to affect the outcome of targeted U.S. Senate and Congressional races.

TEA's specialty is talking to specific individuals who can be persuaded to support energy independence. TEA already has modeled every congressional district in America on energy issues. We will expand, refresh, and refine that data on individual voters in order to execute these district by district campaigns in a hyper-targeted fashion.

TEA's journey started in 2019 with a road map through targeted states important to a presidential campaign. The intention is a four-year road trip that will take us to all the critical states by 2024. In 2020, we spent the bulk of our time in Michigan, Pennsylvania, Ohio and Texas. In 2022 we will expand our journey to include: Arizona, Florida, Georgia, Iowa, North Carolina, West Virginia and Wisconsin.

# America's Declaration of Energy Independence

Life, Liberty and the Pursuit of Happiness are the inalienable Rights in our Declaration of Independence. We fought for and secured these Rights and grew a nation bountiful in natural resources. The ingenuity and hard work of the American people have brought us to another self-evident truth: Energy Independence is within our grasp.

***Affordable, clean, and abundant energy is the birthright of every American.***

These domestic treasures should benefit the daily lives of our people and solidify our security for generations to come. Natural gas makes this possible now, not decades in the future. Its benefits will be felt throughout American society:

***Affordable Energy for Our Families.*** From the jobs created to lower utility bills and cleaner air, affordable energy is fundamental to economic prosperity for all. It is a moral imperative to provide for families who are most vulnerable to increases in their energy budgets.

***Clean Energy for Our Environment.*** We lead the world, by a wide margin, in cutting CO2 emissions. America's natural gas is the fiscally-sound, reliable and environmentally responsible bridge to our energy future.

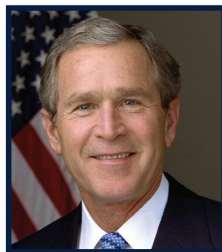

***Abundant Energy for Our Future.*** Technology and exploration have guaranteed that America has a continuous 100-year supply of natural gas and the potential for even more.

***Domestic Energy for Our Security.*** The use of domestic natural gas discovered, produced, and refined in the U.S. makes certain America is no longer dependent on rapidly changing global markets and unstable or hostile countries.

***We, the undersigned, are committed to achieving the above goals and establishing America's Energy Independence for the lasting good of our nation and future generations.***

## NOTABLE SIGNERS

Over 1000 signers in the last year, including notables such as: President Bush, Senator Cruz, Senator Portman, Governor Ricketts, Governor Abbott and Leader McCarthy

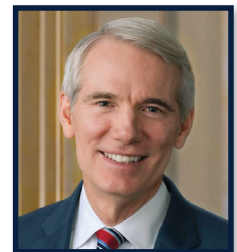

FORMER PRESIDENT

*George W. Bush*

SENATOR (TX)

*Ted Cruz*

SENATOR (OH)

*Rob Portman*

GOVERNOR (TX)

*Greg Abbott*

MINORITY LEADER (CA)

*Kevin McCarthy*

GOVERNOR (NE)

*Pete Ricketts*
